Summary

Aim is to create a big encyclopedia of Gridfinity bases and boxes

[Hobby & Makers](#) > [Organizers](#)

Tags: [gridfinitybaseplate](#) [gridfinity](#) [gridfinitybin](#) [encyclopedia](#)
[gridfinitygenerator](#)

Recently I have recently got into Gridfinity world and I'm amazed. Super easy to print and even easier to user and organize you stuff.

I have also discovered a fantastic plugin for Fusion 360 called "Gridfinity Generator" that makes even easier to create standard bins/bases ready then to be adapted to your needs.

[Link to Gridfinity Generator \(Fusion360\)](#)

Using this tool my aim is to create a kind encyclopedia of bases and bins to ease the work for printers that are not familiar with Fusion360.

The number of potential models is almost infinite, but I'll do my best to cover most of the standard needs. If you have any special need that is not yet covered, pls leave a comment I'll do my best to support you.

Thanks for you attention and don't forget to like the model!

Some technicalities:

Base width unit 42 mm

Base length unit 42 mm

Bin height unit 7 mm
