*There will be more Gridfinity inlays for the different Ikea Alex sizes as soon as I get my hands on them to measure and testfit.

**There will be better pictures in the future.

The first prints didn't look good cause the filament was bad.

Will reprint it when i have the time and then add better pictures but I think

you get it anyway.

***I'm normally not using PrusSlicer but I did Slice the models for the g-code print time preview.

I couldn't select the correct printer here. I printed it with an Ender 5 Plus.
