### Summary

So versatile! Use these all over the house, from holding up vinyl rolls, caulk and silicone tubes to foil and clingfilm!

This set includes the following sizes:

- **Mini hook (25cm)**
- **Standard hook (50cm diameter)** - great for Cricut vinyl rolls, wrapping paper, compost bag rolls, hammers.
- **Grand hook (75mm diameter)** - I use these for larger vinyl rolls, silicone and caulk tubes in the workshop, boxes of clingfilm and foil.
- **Titan hook (100mm diameter)** - just in case you have something in between grand and colossal to hang up!
- **Colossal hook** - this mega hook is good for bin bags and those larger items.
- **Herculean hook (150mm diameter)** - sometimes kitchen roll is massive! So this is good for that.

## Requirements

- This set of hooks is designed to work with **Multiboard**. Credit to Jonathan from Keep Making for the fabulous Multiboard.
- They slide on to **MultiConnect**. You will need a minimum of one MultiConnect per hook, but use at least two to make them stable. Credit to David D for this fantastic design.

You can see the standard and grand hooks in use in the following video (here I call them ‘big hooks’ to distinguish from peg hooks).
