This is a remix of Lukki15's "Adjustable Dual Laptop Stand" and while I loved the original design, I remixed to save on desk space and hardware.

I've printed three of these for different laptops and it worked perfectly for each.

Please post a make/photo and leave a like if you happen to make my designs. It really helps out makers on Printables. Also, If you enjoyed the design and feel so inclined, feel free to leave me a little tip. Everything goes back into my 3D Printing Habit.

Thanks!
