Introducing the only tool set you'll ever need to tame those wild curves and edges in your workshop – the Fine Fillet Gauge Set.

Use these to measure the exact radius of a curve on an object so that you can create a perfectly matching rounded edge. This will come in handy no matter what you're specialty: 3D printing, laser cutting, Cricuting, woodworking and many more!

Includes:

- 23 Fine Fillet Gauges (3mm-20mm in 1mm increments, 20mm-40mm in 5mm increments)
- Custom Gridfinity holder

See them in use on my site: <https://handsonkatie.com/>
