This is a holder for Wera Kraftform Micro screwdrivers. I've designed it for the big pack 1, but it obviously fits any Micro screwdrivers from Wera. If you have the big pack with 25 screwdrivers, you'll just print two and stack them. To get a good surface, I had to set the infill to 20-25 %.

I've also made labels so it's easy to see which screwdriver goes where. They print separately on a multicolor printer. Just drag both the body and the text part in to the slicer and chose color to your liking. After printing, just snap them into one of the appropriate slots in the holder. If you change your mind, you can pry the labels lose quite easily. If you're having trouble with the fitting, scale the labels up or down a tiny bit.

I'm new to this, so feedback is appreciated.
