A garbage bag dispenser that can be changed to your needs. Main parameters are Height, Roll Diameter and Number of Rolls. In Fusion 360 open the 'Change Parameters' option to change your values.

I've included a few generic versions that fit the Mk3 and Mini and should cater to most people out there. Infill shouldn't be necessary if you use enough bottom layers.

The dispenser was designed for the rolls to be positioned vertically but it should be no problem to fix them horizontally.
