Tags: [pegboard](#) [skadis](#) [wera](#) [hexbit](#)

This is a skadis mount for Wera's Hex-Plus kit. Print-in-place, with supports. The mount just clips into the skadis board, and the Hex-Plus kit can be slid in.

Print Instructions

Any layer height should do, the model in the pictures was printed with a **0.6mm nozzle, 0.2mm layer height**. Do **enable support material** . **If possible use at least 3 perimeters**. The support material is used to support the upper set of clips in the back.
