Summary

Remix of Onelostcause's "Gridfinity Deburring Tool Holder" with added low profile blade storage.

[Hobby & Makers](#) > [Organizers](#)

Tags: [deburring](#) [deburringtool](#) [gridfinity](#)

This is a remix from [Onelostcause](#); original model found [here](#).

The original model is great for holding any standard/generic straight handled deburring tool. I wanted to incorporate blade storage while still retaining the ability to stack other [gridfinity](#) modules on top of it, so I incorporated horizontal blade storage. It holds seven blades across and can be stacked a few layers high.

Print Settings:

.4 mm nozzle

.2 mm layer height

Cubic infill

3 walls
