### Summary

Hold 9 tips for your Pinecil, in Gridfinity form!

Somehow every Gridfinity Pinecil bin out there just has a few holes, along with a spot for the Pinecil itself. But I bought a bunch of different tips, so I need a place to put them all.

The holes are tight enough so that you can tip the bin upside down and they won't fall out. So make sure your printer is dialed in.

This bin is a **Pressure Fit design**, so requires no glue to hold the magnets in place.
