### Summary

Lightweight and quick to print Gridfinity drawers

[Hobby & Makers](#) > [Organizers](#)

Tags: [drawer](#) [gridfinity](#)

I was looking for some modular stackable drawers from my Gridfinity bins, but the ones I found required almost a quarter of a spool and an entire day to print, so I created this model. It was sized to max out an Ender sized bed (235 mm) and each layer should take about 100g and 3h to print (on a reasonable fast printer).

It will fit any Gridfinity bin (3U), but for commodity I added here my bins of choice from Masibu (<https://www.printables.com/model/353224-gridfinity-lite-ultra-blocks-template/files>).
