### Summary

A small and strong pin that can be used in the Multiboard to hold stuff

[Hobby & Makers](#) > [Organizers](#)

Tags: [organizer](#) [holder](#) [hook](#) [pin](#) [multiboard](#)

Te used with the [www.multiboard.io](http://www.multiboard.io) system

A small and strong screwable hook to be used in the Multiboard pegboard holes. The hook is printed sideways to make it very strong.

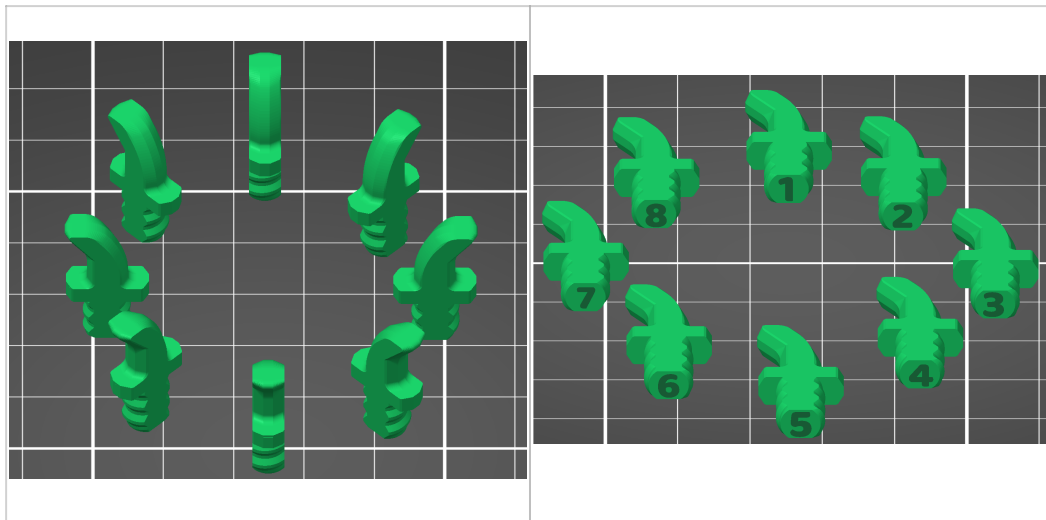

#### Orientation

The orientation of the hook will vary depending on how you installed your multigrid, especially for squared ones as they can be installed in any of the 4 orientations.

To find out which hook you need (for each board) just print 4 of them to test (#1, #3, #5, #7) and find out which one points up for each board :D (I have uploaded a test print for this purpose).

I put numbers on the back of each hook for printing reference, just note that the 1 is not always “up” but it's just a starting reference for the rotation.

PS: I also added a few more hooks with halfway rotation in case you need them (#2, #4, #6, #8).

## Model files

**print-this-first-test-print-to-check-orientation-by... .3mf**

☐ Contains #1, #3, #5, #7 (0, 90, 180, 270 degrees) check which one points up

**short-multiboard-hook-all-orientation-by-kunzite.3mf**

☐ Contains all orientation, print the one you need.

### **long-multiboard-hook-all-orientation-by-kunzite.3mf**

☐ Contains all orientation, print the one you need.

### **bonus-hookable-holder-by-kunzite.stl**

☐ A plate that works well with the hook, you can add it to your model to hold them easily.
