### Summary

Have too many cables laying around? Tired of stuffing them in a bin? Put 'em on the wall with this!

I know how it is... You buy a lot of cables. HDMI, USB, Power cables... a whole mess of cables. They're in a pile on the floor, on your desk, on your bed... it's a mess. It's not easy to find a significant other who's down with sharing the bed with cables. Why bother? Put 'em on the wall! (The cables... definitely the cables!)

“But Pong!”, you say. I respond that I don't want to be called ‘Butt Pong’ and you tell me that you hadn't finished the sentence. I apologize and you proceed. “I've gotten other cable hangers before and they just don't fit my cables!!! I end up having to modify my OWN FILES!!! AUUUUGGGHHH!!!!”. The room gets a little quiet but I continue, undaunted.

Well, worry no longer!!! These suckers are fully parametric! Just go to Modify/Change Parameters and modify these suckers to your heart's

content! You can change the width of the slot, TotalWidth of the whole arm and ArmLength as well!

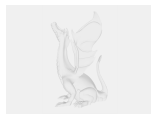

Now, I gotta tell ya here. Keep your mitts OFF of the HalfTotalWidth, HalfSlotWidth, and CurveInset parameters. The first two should be pretty obvious and the 3rd one practices the Dark Arts. I'm not your mother, do whatcha like, but if it breaks or you turn into a bat or screw up the multiverse, that one's on you.

Now, you may be noticing the guy in there that's NOT a hook. Just a couple of arrows living their best conjoined lives. Well, that right there is a hangar for the 20mmx20mm extrusion that these suckers are designed to work with! This guy thought of everything!!

See the picture if you get confused, see a therapist if you get depressed, see the Synshop Livestream at [twitch.tv/synshop](https://www.twitch.tv/synshop) if you'd like to see this and other projects getting built!
