Summary

Gridfinity stand for Bondhus metric hex balldrivers

[Hobby & Makers](#) > [Tools](#)

Tags: [fusion360](#) [tools](#) [toolholder](#) [bondhus](#) [gridfinity](#)
[driverstand](#)

This is a stand for the 6-piece Bondhus metric balldriver set with a gridfinity base. Fusion 360 and STEP source files are included.

This model is a remix of something similar that was slightly larger and did not have the gridfinity base, but I have not been able to find the original publisher to give credit. I believe the filename was Hex_Toolholder_V6, but searches on several sites have not found it. If anyone has a link to that model, I will add it and credit the author.

Update 3/12/23 - Thanks to input from Printables users [Daniel Dunn](#) and [AlienThePete](#) , all files have been updated with a slightly larger hole diameter for the 3mm driver.

[Bondhus 1.5mm - 5mm Balldriver 6-piece set](#)
