A remix of [gridfinity pegboard](#) by [sincityscales](#) and [tray for skadis with divider](#) by [Jack104](#) to allow a base for the [gridfinity system](#) created by [ZackFreedman](#) baseplate to be mounted on IKEA SKÅDIS pegboard.

I printed it a 0.2mm layer height using supports on the hooks.

I recommend using the [Gridfinity Baseplate Magnet Jig](#) to insert magnets into the baseplate and the [Gridfinity Magnet Glue Up Jig](#) to insert magnets into gridfinity organizers.
