I really like **mhejjas' Gridfinity 1 x 1 x 2 and 1 x 1 x 3 inserts with cover, divided in multiple ways**, but I also wanted to make bins of arbitrary sizes.

This is a parametric reimplementaion of the original model in OpenSCAD, using **Gridfinity Rebuilt in OpenSCAD** by **kennetek** for the core **Gridfinity** elements.

OpenSCAD usage

The OpenSCAD model depends on included third-party library code. Download and unzip libraries.zip into the same folder as lid-bin.scad.
