### Summary

Easy to print in vase mode

[decorative](#)

I added a mount to hang it pointing down.

I also resized the spiral to make it more sleek. I think it looks better this way and it is easier to print too.

Looks best in silk or transparent filament.

Ornament\_thin\_mount\_v2.stl has a wider ring for more strength.

### Print settings

The spiral should be printed in vase mode with 0.5mm line width and 0.2mm layer height. One or two bottom layers should be enough.

Print the mount separately with 0.1mm layer height, no bottom layers and a minimum infill.

## Post-Printing

Glue the two parts together.
