Summary

remix of a model for a case for (micro)SD cards with smaller form factor and slightly different tolerances for the slots

Hobby & Makers > Organizers

Tags: microsd sdcard sdcardholder

| BASIC DESCRIPTION |

- it is a remix of a model found here:

https://www.printables.com/model/20415-sdmicrosd-card-case

https://www.printables.com/model/23326-sdmicrosd-card-case-snap-fit

- this remix has 8 slots for microSD, and one for the adapter (or a full sized SD card)

| DESIGN DECISIONS |

- it was also completely remodeled from ground up because I have found that the two previous models had much tighter tolerances on the micro SD cards than I wanted it to have, so I made mine a little wider and with an additional cut out so the microSD cards can be slid out easier

- I really liked the snap fit on the remix so I incorporated it in my remix too
- also, I wanted to make it smaller and to pack as much as microSD cards as possible in this form factor, and only one adapter - I always only need one when I am on the road

| PRINT SETTINGS |

- **General notions:**
    - no supports required
- The settings that I used:
    - **Resolution:** 0.15 mm
    - **Infill:** 20%
   - **Filament:** PETG
