Summary

Pocket or Desk Valet

Fashion   >   Other Fashion Accessories

Tags: gridfinity   deskvalet   gridfinitybin   valettray

Provides several different gridfinity bins/widgets that can be used to create desk-valets or pocket-valets. While these should work well with almost any gridfinity baseplate they are designed to work best with the "Gridfinity Refined" models.

Mix and Match

In many cases you may want to stay with a single height (such as 3) and then mix both "Bowl" and "Round-Rect" widgets into your valet. You may want to have several different heights or whatever you want.

Printing

No supports should be needed for any of the models.

3 walls, 3 tops, and 3 bottoms with lightening infill works very well.

Revision History:

2023-03-04: Add bins for "Desk" Mail.

2023-03-09: Update all bins based upon the latest Gridfinity Refined templates. Change the filenames to respect the gridfinity order of: width x length x height (previously, height was the first). Added more bins with more variety. Changed the "Straight" bin to be "Round-Rect".

This is a replacement for one of my previous models: https://www.printables.com/model/389405-gridfinity-modern-pocket-valet
