Gridfinity 2x2 Tactile Spiral Vase Pen Cup

C **cb88**

VIEW IN BROWSER

Summary

Tactile Spiral Vase Pen Cup scaled X/Y to 2x2 gridfinity and merged. Slice with 30 solid bottom layers.

Household   >   Office

Merged gridfinity adapter plate + scaled to size of the plate in X and Y. 30 solid bottom layers at .2 height, vase mode for the rest in superslicer (not sure if PrusaSlicer can do this as of 2.5 yet).

Setting Vase mode in Prusa Slicer with 30-32 bottom layers @ 0.2 layer height appears to also provide the correct behavior.

Base ends at 29 layers, 30's layer is also "solid" so you don't get a line across the base where it is doing spiral vase mode from the edge of the base inward.

Licensed under the base license as it is slightly more restrictive.
