What Files to Download

Chose a model based on the pictures below

Single Swipe:

Double Swipe:

Double Swipe Curved:

Also available is the **Self
Watering Insert:**

Print Instructions

It's important to ensure the planter is water tight. Here's some print settings that worked for me. Check out the [prusa guide](#) to getting watertight prints too!

Filament: PLA or PETG

Supports: None! All my designs are created to 3d print without support.

Perimeters: 3-4 (to achieve watertight seal)

Layer Height: 0.15-0.3mm

Scale: Multiple people have found that scaling the model up has been useful. Check the comments for some different dimensions.

And finally share a picture of your print in the comments section. Choosing two different colors for the **Self Watering Insert** and the **Planter** is a fun way to make the print pop, and I would love to see any color combinations you come up with.

Change Log:

6/20/21 - added new version: Double Swipe Curved.

8/3/21 - check out [this link](#) for another self watering planter

8/13/21 - set correct scale for double swipe curved planter
